

## Occupational Hygiene Training Association (OHTA)

OHTA promotes higher standards of occupational hygiene practice as well as a qualifications framework worldwide to ensure that all hygienists are trained to the same consistently high standards which participating countries throughout the world will recognise.

Occupational Hygiene offers challenging and worthwhile roles protecting the health of people at work. It can provide enjoyable and rewarding career prospects in industry, government, consultancy, education or research.

### Benefits of occupational hygiene

Good occupational hygiene benefits workers and industry alike. It results in:

- Improved worker health and increased life expectancy
- Reduction in the number of people who have to leave employment early through injury or illness
- Lower social and healthcare costs as well as maximizing worker potential
- More efficient working processes with technological improvements and increased productivity.

### The value of qualifications

Protecting the health of people at work is a responsible vocation. Mistakes and errors can have serious consequences.

### How you benefit

Following the [international qualifications](#) structure will help you to pinpoint your strengths and areas of weakness and to **set targets for your own improvement**.

Qualifications combined with experience will demonstrate to your employers, potential customers or future employers that you have undertaken a recognised path of study and have the requisite competencies to carry out a range of [occupational hygienist](#) functions. You will **enhance your employment and career opportunities**.

As a holder of recognised qualifications you will also **be eligible to apply for professional status** which is offered by a number of national associations. Professional status is recognised internationally and enables Hygienists to participate in continuing professional development schemes.

**Poltech (Pty) Ltd** is an Approved Course Provider in Southern Africa for OHTA and are one of a few to offer the OHTA modules.

The courses are certified by OHTA and upon completion and passing a certificate of **Competence in Occupational Hygiene** will be provided. Examinations will be facilitated by the Southern African Institute for Occupational Hygiene (SAIOH) and assessed by OHTA.

Poltech provide training in the **intermediate level** for the following courses:

- W201 - Basic Principles of Occupational Hygiene
- W501 - Measurements of Hazardous Substances
- W502 - Thermal Environment
- W503 - Noise Measurement and its Effects
- W504 - Asbestos and Other Fibres
- W505 - Control of Hazardous Substances
- W506 - Ergonomics Essentials
- W507 - Health Effects of Hazardous Substances

The training will be done by a SAIOH qualified person who has a rich experience in the field of Occupational Health & Safety. Training will take place at the premises of Poltech (Pty) Ltd:

114 Willem Botha Street, Eldoraigne X6, Centurion, Gauteng.

The cost per module includes attendance, course material, light lunch and refreshments during tea breaks.
